## Recycle Questions

When it says “recycle” and is not highlighted are those just cardboard containers?

I believe all recycle is just cardboard, with paper included in it.....except for the two smaller carts at Mar Lee, which recycle plastic, tin, glass, etc.

There are some recycle dumpsters that are a co-mix of recycle items.

I will re-do the worksheet for Lakeview to update that information.

I have also found a couple of other changes in the requests.

\*\*\*All changes have been highlighted in gold on the worksheets.

The items that I have highlighted shows anything that is NOT a "weekly" pick-up. Since the majority of the lines are weekly pick-ups, I wanted to bring to your attention the ones that weren't weekly.

## Open Top Questions:

20 yard open top at CACC : How often does that get picked up, and do you have a history of weights on it or can you tell me what the average weight is on it?

That container we have there (and sometimes at DKDC) is just used on an “as needed” basis, as we have projects that we need them for. We have no idea on the weights of those dumps.

40 yard open top at Harper Creek: Can you tell me how many times per year it gets picked up and weights for it?

HCHS Roll Off Info:

3/1/24 - 9.53 tons

3/26/24 - 4.39 tons

6/3/24 - 11.14 tons

9/23/24 - 13.67 tons

11/26/24 - 12.29 tons

1/16/25 - 8.9 tons

## Container Type:

Did you have any specific container type request or extra items such as a lock bar or side doors needed on any of these containers?

CISD-Gifford Schultz Building: I know we have lock bars on these two containers.

CISD – DKDC & CACC: We would also like to get lock bars on those containers.

CISD – DKDC & CACC: We would like to have the side doors/sliding doors for those containers.

I haven't heard back from Lakeview yet, but none of the other districts need lock bars or side doors.

I have one district that would like lock bars on dumpsters at two locations. They are at Lakeview Schools, and the buildings are Riverside Elem. and Prairieview Elem....for both trash and recycle.
